Many ways to reach our listening stream from your computer:

1.   Click on any of the listening links at the Homepage of WIXY1260Online (www.wixy1260online.com)

2.   If you first go to our Listen Page (www.wixy1260online.com/listen.html), click one of the Play Now links.

3.   When you reach the launch page, you are presented with listening choices. Most computers and browsers prefer the MP3 stream, but if you have FlashPlayer installed and enabled, you can try to listen to the AAC Stream. (Our mobile apps use the AAC stream because it uses less mobile data—this doesn't matter if you're using a home internet connection, however.)

4.   All internet browsers have a "refresh" / "reload" icon on them in the address line. If you are unable to hear our stream, reloading the browser should help. This action will point you to the most recent version of a webpage and make sure you are seeing the most up to date info.
